Storefronts INC is working to reduce engagement with policing in our community. We are creating skills and connections to be able to support medical, emotional, and other needs in our community.

On reverse are some alternative resources to calling 911. It is not guaranteed that the police will not be engaged with these resources so when calling it is advised that you ask if police will be dispatched and be clear that you do not want the police to come.

We encourage other storefronts, small businesses, and community centers to reach out and get involved in our network. Together we can work to build safer communities without policing.
