Storefronts INC is a network of small businesses and organizations formed in Oakland in 2021. We are creating skills and connections in order to prepare ourselves to face challenging disturbances and medical emergencies WITHOUT CALLING POLICE.

On reverse are some alternatives to calling 911. When calling these non-police lines, we advise that you state clearly that you do not want the police to come or to be involved..

We invite storefronts, small businesses, and community centers to reach out and get involved in our network. Together we can work to build safer communities without criminalizing poverty, without callousness to the suffering and disparities of our times, and without the harmful extension of military force they call police
